SUMMARY

I am NSABIMANA Emmanuel, whose specialties include quickly learning new skills and programming languages, problem-solving, responsive design principles but I am still enthusiastically grabbing onto any other programming languages, frameworks, or principles I can integrate into the coding web in my head.

EXPERIENCE

Full-stack web developer and open-source enthusiast with a love for clean code and accessible design. Pair-programming and remote work. Fluent in multiple languages, frameworks, and technologies, and capable of ramping up quickly and efficiently.

Microverse, United state, *Remote*

Mentor (Volunteer), March, 2021r – Present

- My duties are to provide some improvement in codebases as well as providing guidance to my mentees, helping them to write cleaner codes, to overcome some blockers he or she has, and overall better-performing projects.
- Mentored students on a 1:1 basis over video calls to provide both technical and professional assistance as they completed individual and group projects in HTML, CSS, Bootstrap, SASS, and Ruby.
- Provided advice and tips on how to maintain motivation to maintain longevity in the program.

ES-connect-us Rwanda

Owner and Software developer (March 2020 - Present)

- I am the Owner and software developer of the website we use to interact with the customers.

SKILLS

Front-End: JavaScript, React, Redux, jQuery, HTML5, CSS3, SASS, and Bootstrap.

Back-End: Ruby, Rails, Postgres, and NodeJS.

Tools & Methods: Git, GitHub, Heroku, Netlify, Mobile/Responsive Development, RSpec, TDD, Chrome Dev Tools

Professional: Remote Pair-Programming, Teamwork, Mentoring.

PROJECTS

Project1: ES-CONNECT Project

<https://esconnectus.com/>

E-commerce websites used to help small businesses to announce their works.

Built: HTML, CSS, jQuery and Bootstrap.

Project2: Broadcaster

Broadcaster enables any/everyone to share any incident related to corruption to be resolved and even to

EDUCATION

MICROVERSE, Feb 2021– Present

Remote Full Stack Web Development Program, Full Time

- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair-programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.

UNIVERSITY OF RWANDA, November 2017 – Present

College of science and technology, Full-Time class

Bachelor's degree

- Computer and software development

PROJECTS

ES CONNECT US Web App

<https://esconnectus.com/>

- The purpose of this was and is to help the businesses with the wonderful goods and services with an advertisement as well as to announce their works in a collaboration with them to deliver the goods to the customer.

- We came up with this idea after finding out the many businesses have good products as well as services but the opportunities to them of doing advertising or letting people know their business are not there for some of us.

intervene with the government as long as you get any information related to bad roads section, floods and etc to be checked and solved.

Built: HTML, CSS, Javascript and NodeJs

Project3: Directory of schools.

Patashule is a web app that bridges the gap between schools and parents. We developed this as a result of a felt need by parents/ guardians and learners for adequate accurate and necessary information on their preferred schools and inability to apply online.

Built: HTML5, CSS3, SASS, and Bootstrap.

LANGUAGES

English, Swahili
